

Ethanol Plant * L.P.D.	Direct jobs	Indirect jobs	Cane mill/day	Surface To cultivate**
500,000	350	1,937	6,250 Tons	13,333 Ha

The new Ethanol plants; must to have new areas to cultivate his own cane field, as it will not compete with traditional Mexican Sugar cane Plants. The latest plants designed and built in Mexico (by REGPA), feature the latest technology using the bagasse as fuel only (zero fossil fuels) are electrically self-sufficient, in addition to a surplus that sent to the CFE network . (Clean Energy) The Ethanol plants generate employment, and regional economic growing.
